The SPORTTRAXX YB tracking device for

ALGERIA RALLY 2016

The **YB3** automatically sends your position, and allows you to send and receive short messages from anywhere along the race route with a clear view of the sky. It works far beyond the reach of WiFi and GSM networks.

It will wake up on a regular basis, obtain a position using the GPS satellite network, and then transmit that position back to Sporttraxx using the Iridium satellite network in seconds. The message is relayed to us from Iridium, and the positions/alarms are monitored in race control.

It is a 2 way technology that allows you to communicate with race control through a list of preset messages or to edit your own text. Race control will send you messages on your display within shortest time.

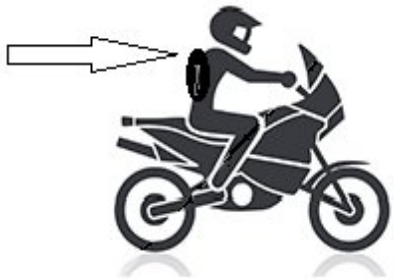
A protected SOS button allows the immediate transmission of a request for medical assistance.

It works with an internal battery covering several days of race and there is no need for any electrical connection to the vehicle. The version for bikes has internal antenna and is carried by the competitor. In that way it is always reachable in case of accidents. In the cars, it can be fixed to the roll cage or the dashboard and is supplied with a small external antenna. There is no need to buy and install expensive bracket or wiring.

INSTALLATION

For Bikes and Quads

The YB3 tracking unit is provided with a soft pouch and must be carried on the biker. Reccomended place is in the **backpack/camelback**.
During the race, Sporttraxx, or the organizer, will check randomly that the device is located in the correct way.



IMPORTANT: **ANTENNA MUST ALWAYS BE UP !**

Display facing toward outside ! Do not keep buttons pressed !

Do not cover with metal or carbon objects !

Each morning, at the start, a Sporttraxx technician will check that the unit is properly activated and located on the competitor.

For Cars and Trucks

The YB3 tracking units is provided with a simple bracket that can be fixed on the rollcage with zipties or on the dashboard with adhesive velcro.
The combined antenna must reach the roof of the vehicle and have free view of the sky.
A small power cable needs to be connected to the vehicle's battery.
Therefore just make sure to prepare a 12 volt power supply (open ends) available in the front side of the car (side of codriver)

During Technical scrutineering a Sporttraxx technician will assist you for the fixing of the device in your car.

Each morning, at the start, a Sporttraxx technician will check that the unit is properly activated.

HOW TO USE THE YB3

For your own safety, during the race, do not change location of the unit.

Bikers: make sure it is fitted in the proper position in your camelback

Cars: make sure the antenna has always free view to sky. If you had a roll over, please check that the antenna cables are not damaged

If you feel something is not OK, please report to organizer. The device or the antenna can be easily exchanged.

SOS IN CASE OF EMERGENCY

If **you need urgent medical assistance**

PRESS and HOLD the SOS button.

After a 5 seconds countdown the SOS will be sent.

Now you can send us further details accessing the messaging options

You will also receive confirmation from Race Control

If you do not receive any message from Race Control, within 3 minutes, please repeat the SOS procedure.

2. Select the **MESSAGES** menu
3. Press OK
4. Select the **INBOX** menu
5. Press OK on the message you want to read

DEPOSIT

A deposit of euro **1.000,00** (one thousand) is mandatory when renting the YB3 Sporttraxx tracking device.

The deposit will be collected during administrative checks of the event and can be paid by:

- Cash
- Bank check

Once you have paid the deposit you will receive a **plastic chipcard** with your racing number.

That will entitle you to collect the tracking device at scrutineering (cars only) or at the start of day 1 (bikes and quads only)

The deposit will be cashed only if the tracking device is not returned or has been totally damaged during its use. In case of partial damages, the repair costs will be deducted from the deposit.
In case of withdrawal from the event, the tracking device must be returned only to Sporttraxx technicians who will issue a chipcard receipt which entitles to the collection of the deposit. The tracking device will be normally collected at the finish line of the rally and the chipcard receipt will be given.
Tracking devices which are returned to Sporttraxx later, after the end of event, will be invoiced euro **100,00** per week.
